

## Home Made Yogurt - Just the Way YOU Like It!

Using the EasiYo yogurt maker is as simple and easy as making a cup of tea. No mess, no fuss – makes perfect yogurt every time.

The innovative new design enables you to make fresh yogurt in the comfort of your own home, just the way you like it and at a fraction of the cost of shop bought yogurt.

The EasiYo System consists of a patented yogurt maker, storage jar and sachets containing yogurt base and fruit toppings. Just pour boiling water into the yogurt maker and the unique design traps the hot water under a baffle which allows a slow release of heat for up to 8 hours. You can prepare yogurt at anytime and keep it in the fridge just like fresh milk. There's a wide range of yogurt base flavours and styles, from low fat to full cream and the toppings contain real fruit pulp so you can choose a flavour and style to suit your own taste. Starter kits are now available from selected UK stores and cost less than £20, which makes them an ideal gift for all the family.

*“Until now, yogurt making has been considered a messy exercise and the results often varied.”* says Len Light, the New Zealand inventor of the EasiYo system. *“So we developed a totally unique system which guarantees perfect results every time.”*

## Yogurt maker set to revolutionise healthy eating

*“Our yogurt maker is set to revolutionise healthy eating”* added Len. *“When you make fresh yogurt at home yourself you get the benefit of the millions of live active cultures in your digestive system. Stress, illness, bad eating habits and the use of antibiotics are some of the things that can deplete the supply of ‘good’ bacteria in your system. Eating freshly made yogurt every day helps to rebuild your natural supply.”*

EasiYo is a New Zealand owned company, founded twenty five years ago and now market leader in the home-made yogurt industry. The company's unique Yogurt Making System is marketed and distributed via branches and distributor network channels worldwide.
